Journal for Educators, Teachers and Trainers

This new magazine, published yearly, is created with a clear perspective: improving the MUNDUSFOR and DEPROFOR consortia, giving it an international renown and granting it a perspective of research, beyond the educational perspective of today. Our intention is also to develop an electronic magazine for the field of the educational professionals.

The objectives of *Journal for Educators, Teachers and Trainers* (M&DJETT) are therefore centered in different aspects of academic and research diffusion related to the teaching professionals. In one hand, M&DJETT pretends to become an educational research database. In the other hand, a second objective of the publication is to facilitate for young researchers the diffusion of their work, masters and doctorates students above all, and to serve as an advertisement vehicle for works which have not reached the article format yet. Besides, another function for M&DJETT will be the diffusion of publications through reviews.

CONTENTS

EDITORIAL

- Editorial: International perspectives on early childhood** 6-12
Pilar Ibáñez-Cubillas (special issue coordinator)
